# PRECISION BRASSWARE FORGED IN ITALY

UNION, setting a new standard for contemporary brassware engineering, is an innovative collection and leap forward in design for the modern bathroom. Presenting the finest in Italian brassware artisanry, each component is precision machined, cast, polished and perfected to offer an elevated bathing experience.

In a move to challenge the traditional concept of bathroom fittings, UNION is engineered to provide unparalleled functionality and designed to make a statement. Only the very best components are used, coupled with stringent quality standards resulting in a product that will stand the test of time.

UNION brings you four distinctive finishes available across a complete collection of bathroom faucets, valves, shower heads and bath fillers.

100%  
BRASS

## CUTTING-EDGE FROM START TO FINISH

---

Smart on the inside, UNION is manufactured using the most advanced brassware engineering techniques and the latest in cartridge and thermostatic valve technology to offer complete water flow control. Behind the scenes each product is intuitive, high performing and built to last, offering the user a premium level of functionality with each and every use.

*“The design of the UNION range is inspired by iconic industrial forms and renowned Italian design flair to produce a simply outstanding new standard in brassware form and function to bring our customers a truly premium product.”*

## PRECISION ENGINEERED FINISHES

UNION is tailored to the individual. Four refined finishes are offered across the entire collection, presenting a selection of brassware products that are as beautifully coordinated as they are designed.

For the traditionalist, UNION brings you classic Polished Chrome and Brushed Nickel finishes. Those seeking a design statement can opt for on-trend Unlacquered Brass and the unique Brushed Black Chrome. Each unique surface is complemented with distinctive, knurled detailing, expertly machined as accents on to each individual piece.

## LEVER

---

Elegant in form, streamlined for effortless operation, the UNION Lever is crafted to appeal to the supporters of modern, industrial aesthetic. Knurled detailing to the handle provides both tactility and a contemporary design edge.

## WHEEL

---

An iconic control, the UNION Wheel is synonymous with the industrial era of bathroom brassware design. Stunning knurled edging offers a functional grip, complemented by the handle's robust silhouette and cutting-edge styling.

## RED LEVER

---

For those with a penchant for bold design, opt for the UNION Red Lever. Featuring the range's exquisite knurled surface, this confident pop of color complements all brassware finishes in the collection.

## INDUSTRIAL DESIGN, REINVENTED

---

Transforming everyday bathing into an extraordinary experience, UNION takes inspiration from the industrial era and brings it boldly into the 21st century. Confident, luxurious and designed to command attention in any bathroom, each individual brassware component is crafted in the range's signature, contemporary aesthetic.
